EXPERIENCE

AFSC Software Directorate — **Oklahoma City, Oklahoma**
Computer Scientist — *July 2024 – Present*

- Spearheaded 3 developer team in the creation of new program capabilities from scratch required for client software
- Collaborated on specialist team for 4 months to take tools through rapid iterations of the software development life cycle
- Engaged with 15+ person team at client site to develop flexible and sustainable C++ frameworks for future development
- Produced detailed documentation for vender use in shortening development lead time and reducing integration workloads

Cvent — **Dallas, Texas**
Software Engineering Intern — *June 2023 – August 2023*

- Expanded code coverage of React JS-based web application with Unreal Engine 5 backend using Jest methodologies
- Executed automated scripts to ensure seamless data migration between modeler and developer AWS servers
- Generated 12+ graphs using Datadog to increase application observability and focus on boosting performance in key features

General Motors — **Remote**
Software Developer Intern - Virtual Reality — *June 2022 – August 2022*

- Integrated newly created features, using Unreal Engine 4, into existing code base of over 14,000 files
- Collaborated on a team of more than 18 members to design, update, and debug code-base components
- Refactored vital sections of single-player code base to enable development and implementation of multiplayer features

Morphi Blockchain Consulting — **Remote**
Lead Web Developer/Python Bot Developer — *February 2022 – June 2022*

- Corresponded with clients directly to ensure product quality and meet constantly changing needs in a creative way
- Spearheaded creation of client websites using React JS to meet customer requirements on a project-by-project basis

EDUCATION

Texas A&M University — **College Station, Texas**
Bachelor of Science in Computer Science, Minor in Business - GPA: 3.91 — *May 2024*

PERSONAL PROJECTS

Java Minecraft Plugins — **Multiple Locations**
Developer — *December 2022 - Present*

- Assembled research and documentation outlining requirements for plugin compatibility with desired Java Minecraft version
- Produced 2 plugins created in Java, moving through all phases of the software development life cycle over a multi-year span

Stutter Speak VR — **Dallas, Texas**
Lead Developer/Designer — *May 2021 – August 2021*

- Brainstormed program concept focused on assisting those who stutter in improving their public speaking
- Collaborated with medical professional and licensed, certified speech-language pathologist, Tricia Krauss-Lehrman
- Developed application using Unreal Engine 4 with C++ and Blueprint
- Created systems to track, record, save, and display user data, provide feedback, and handle physics interactions
- Published application, Stutter Speak, on Oculus App Lab Platform for use with Oculus Quest/Quest 2 in August 2021

LEADERSHIP & ACTIVITIES

National Stuttering Association
Chapter Leader - Oklahoma City — *July 2024 – Present*
Chapter Co-Leader - College Station — *June 2023 – June 2024*
Panelist for Speech Pathology Classes — *October 2021 - Present*

SKILLS & INTERESTS

Skills: C++, Python, Git, Java, React JS, Linux Systems

Interests: Immersive technology, Country Western Dancing, DIY Computer & Server Building, Long Distance Running, Snowboarding
